Combined Type Tin Bath Roof Block

1, Main technical parameters of the product

ITEM	UNIT	TECHNCIAL INDEX
Al ₂ O ₃	%	≥58
Fe ₂ O ₃	%	≤1.0
R ₂ O	%	≤0.5
Density	g/cm ³	≥2.30
Porosity	%	≤20
Cold crushing strength	Mpa	≥50
Refractoriness	°C	1790
Refractoriness under load	°C	≥1450
Linear rate of change 1400°C*2h	%	±0.1
Thermal shock stability 1100°C,water cooling	times	≥22

2,Brief introduction: The Combined Type Tin Bath Roof Block adopts the full combination structure, which is composed of bridge brick module, support brick module and plug brick module. The working face of the structure is sintered sillimanite brick, the non working face is 2-layer thermal insulation brick, and the breast wall is mullite thermal insulation brick. In this way, there is no vertical through joint between the upper and lower parts of the structure, which ensures the integrity of the groove milling structure, improves the service life of the structure and the quality of glass products.

3, Application of Combined Type Tin Bath Roof Block : bath top roof

4, Application effect: the structure has good integrity, safety and reliability, and will not produce spot defects on the glass plate, ensuring the product quality and safe application of the structure. It has been applied in more than 300 float glass production lines at home and abroad, and has achieved excellent application effect

5, Good feedback of product use effect, the products have been exported to South Korea, Japan, Pakistan

6, We are a professional supplier, who can provide customers with free product technology, use and other issues

Do you want to find a professional supplier of refractory products?

Do you want to find a professional supplier of graphite electrodes?

Do you want to find a stable and credible supplier?

Then let's contact with jinggan company
